Encyclopedia

Vehicle Facts: GMC Terrain returns for 2016 with safety technologies available on SLE2 and SLT trims, and updated styling cues * In 2013, GMC expanded its exclusive Denali sub-brand by adding the Terrain Denali to the Terrain SUV model line-up * Across the line-up, a larger displacement 3.6-liter V6 engine with direct injection and continuously variable valve timing is offered * A new Terrain Denali model joins the line-up with unique styling and interior appointments, exclusive wheels, and technology features * GMC Terrain comes in a 5DR body style and is available in SLE-1, SLE-2, SLT-1, SLT-2 and Denali trim levels in FWD and AWD configurations * All models of GMC Terrain are offered standard with a 2.4-liter DOHC 16-valve I-4 engine rated at 182 HP at 6700 RPM with a torque rating of 172 lb.-ft. at 4900 RPM coupled with a 6-speed automatic transmission * Optional on all models except SLE-1 trim is a 3.6-liter DOHC 24-valve V6 engine is rated at 301 HP at 6500 RPM with a torque rating of 272 lb.-ft. at 4800 RPM coupled with a 6-speed automatic transmission * * REASONS TO BUY: StabiliTrak is an engineering advance designed to improve safety, stability and control on most road surfaces by employing sensors to read the position of the steering wheel, vehicle speed, brake pressure, lateral acceleration and turning rate * Terrain's brakes have a hill hold feature which keeps the vehicle from rolling backward when the driver removes his/her foot from the brake pedal when stopped on a hill * Direct injection is the culmination of a long evolutionary process by which engineers have moved the point of fuel introduction closer to the point of ignition for greater efficiency * In Terrain, fuel is injected directly into the combustion chamber, right next to the spark plug; digital sensors allow each injection of fuel to be precisely matched to power demand, resulting in cleaner burning and efficient operation * The Terrain's unibody construction makes extensive use of high-strength steel on primary load paths and works to route and absorb impact in the event of a collision * Terrain's structure is designed with front and rear crush zones engineered to collapse in a controlled manner to help absorb crash energy while helping to protect the integrity of the occupant compartment * The safety cage incorporates welded tubular section members that frame door openings and help support the roof, and steel members in the doors, helping reduce side impact intrusion * Energy-absorbing materials provide protection for occupants in the event of a collision * The standard tire pressure monitoring system assesses tire pressure, alerting the driver to a tire with low tire pressure to help avoid an unsafe driving condition * Independent front and rear suspensions add to sharper vehicle reflexes in handling * A six airbag system includes driver and front passenger frontal airbags, front seat-mounted side-impact airbags, and head protection side curtain airbags *

First Owner
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Ownership History
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
